Industrial Pharmacy Residency (September 2019 – 12 months)
Regulatory Affairs, Market Access and Medical Communications

Celgene is a global biopharmaceutical company leading the way in medical innovation to help patients live longer, better lives. Our purpose as a company is to discover and develop therapies that will change the course of human health. We value our passion for patients, quest for innovation, spirit of independence and love of challenge.

“At Celgene, we seek to deliver truly innovative and life-changing drugs for our patients.”

There are more than 300 clinical trials at major medical centers using compounds from Celgene. Investigational compounds are being studied for patients with incurable hematological and solid tumor cancers, including multiple myeloma, myelodysplastic syndromes, chronic lymphocytic leukemia (CLL), non-Hodgkin’s lymphoma (NHL) and pancreatic cancer. As committed as we are to clinical accomplishment, we are equally committed to patient support, which is a guiding principle at Celgene. We believe all who can benefit from our discoveries should have the opportunity to do so. Celgene puts patients first with industry-leading programs that provide information, support and access to our innovative therapies.

At Celgene, our values are what drive what we do every day:

**Passion for the Patient**
We share a belief that what we do matters to the world – that it is essential to the advancement of healthcare. And that how we do it is what sets us apart from those who have come before us, as well as those we will meet in the future.

**Courage to Face our Challenges and the Unknown**
We willfully face the challenges of the past and the uncertainties of the future. We embrace the unknown, pioneering new science and new ways of doing business. Our willingness to challenge the status quo and take on risk is what enables us to create new standards in medicine, and the broader world of human health.

**Trust in Our Words and Our Actions**
We assume the best in each other — in terms of capability and intention — and we treat each other with dignity and respect as we work together to always do what’s best for Celgene. We value each individual for the integrity they bring to their work and their relationships, both internal and external.

**Excellence in Delivering Exceptional Results**
We hold our work to the highest of standards — quality, scientific, and ethical. We also hold each other to equally high standards in the way we work, encouraging creativity and simplicity in problem-solving, transparency in communicating, and results that are data-driven.

**Curiosity and Continuous Learning**
We embrace curiosity and continuous learning.
With a presence in more than 70 countries and growing - we look for talented people to grow our business, advance our science and contribute to our unique culture. We are excited to offer a 12-month Pharmacy Residency in partnership with University of Toronto, Faculty of Pharmacy.

Driven by business requirements, this residency will offer you the opportunity to gain experience through the completion of related projects across Regulatory Affairs, Market Access and Medical Communications. The projects will be assigned based on business deliverables and may be concurrent, giving you a realistic experience of how the Innovative Pharmaceutical Industry works.

**Project Areas**

**Regulatory Affairs & Market Access**

- Create dossiers on new drugs and new indications for submission to Health Canada and Health Technology Agencies to gain marketing approval and/or secure reimbursement.
- Review scientific submission documents such as New Drug Submissions (NDSs), Supplemental New Drug Submissions (S/NDSs), Risk Management Plans (RMPs) and Periodic Benefit Risk Evaluation reports (PBRERs) to ensure alignment to strategy, adherence to Regulatory requirements, accuracy and scientific validity.

**Medical Communications**

- Research and provide responses to Health Care Professional enquiries on Celgene products and disease states of interest.
- Support the creation of materials to facilitate scientific exchange with Health Care Professionals.
- Support the review and approval of advertising and promotional reviews for external communications by validating content against the approved Product Monograph, guidelines and scientific literature.

**Other Projects & Requirements**

- Participate in other projects as required to ensure all requirements of the University of Toronto Industrial Residency Program are met.

**Why should you consider Celgene for your Residency?**

- This is a cross-functional program which will give you exposure to Medical, Regulatory Affairs and Market Access projects related to innovative medicines for rare diseases in hematology and oncology.
• You will be working with several experienced Pharmacists who have made their careers in the Canadian Innovative Pharmaceutical Industry. Learn from the experts and experience valuable mentorship from U of T Pharmacy program graduates.

• You will gain in depth knowledge of the controlled distribution program that allowed thalidomide to come back on the market in Canada to meet unmet medical needs and manage serious rare diseases in patients.

• You will receive an overall orientation to all aspects of an Innovative Pharmaceutical business.

• You will experience a company where the commitment to developing innovative therapies has resulted in an exciting pipeline: http://media.celgene.com/content/uploads/product-pipeline.pdf

• You will experience a culture where our passion for the patient is everything.

Preference will be given to applicants who have experienced a summer or co-op placement in an Innovative Pharmaceutical business / Health Canada, or who have completed PHM 321 Selected Topics in the Pharmaceutical Industry. Excellent writing skills is a requirement.
