We’re recruiting a pharmacist to inform provincial recommendations for a new project at the Provincial Council for Maternal and Child Health (PCMCH). PCMCH provides leadership in bringing the maternal newborn child and youth health care sector together to plan and implement health care practice solutions that improve access to and the quality of, health care provided to mothers and children in Ontario. We have recruited diverse perspectives from across the province to join our Maternal-Neonatal Clinical Advisory Group who advise on policy/quality improvement initiatives, prioritization of such initiatives, and identification of concerns, challenges, and/or barriers to implementation of practice change related to the clinical content reviewed.

We are embarking on Safer Birth Initiative which will include recommendations and tools related to the safe administration of oxytocin. We would most benefit from the engagement and expertise of a pharmacist as we develop and implement this strategy.

Interested candidates are asked to complete the Expression of Interest Survey found online here no later than 4 pm on Wednesday, January 16th, 2019.
