ABOUT US

Headquartered in Denmark, Novo Nordisk employs approximately 42,600 people in 75 countries and markets its products in more than 180 countries. Novo Nordisk is a global healthcare company with more than 90 years of innovation and leadership in diabetes care. This heritage has given us experience and capabilities that also enable us to help people defeat other serious chronic conditions such as haemophilia, growth disorders and obesity.

In Canada we are ranked as one of the top employers to work for and we offer you an opportunity to work with extraordinary talent and benefit from a range of possibilities for professional and personal development.

Opportunity:

The pharmacy resident will have an opportunity to participate in a rotational program structured within the Medical Affairs and Strategic Operations business units of the Clinical Development, Medical and Regulatory Affairs (CDMR) team. Alternatively, the Resident and program can decide to switch the Medical Affairs rotation with one in Clinical Development.

Responsibilities will include:

1) Medical Affairs:
   a. Enhance the clinical understanding of Novo Nordisk products for the Sales and Marketing teams
   b. Participating on global cross functional teams to increase awareness and help in the translation of treatment guidelines into practical applications
   c. Support the development of various Key Opinion Leader (KOL) engagement plans

2) Strategic Operations:
   a. Acting as a resource for various cross functional teams to build or augment the medical strategy to suit the Canadian environment and implement projects aligned with these aims.
   b. Acts as a liaison between Field and Head Office Medical Affairs to ensure a positive alignment between trial clinicians, KOL researchers and KOL speakers for current and future products.

3) Clinical Development:
   a. Understand the clinical trial process both from HQ and from a local perspective
   b. Answer clinical trial related questions internally and externally
   c. Contribute to the generation of local data to fill clinical data gaps
   d. Support and provide data in response to global product development plans

3) Provide project management support for both the Medical Affairs and Strategic Operations units including medical education and internal training.

4) Lead a capstone project of strategic importance in agreement with the VP, CDMR.
